

PYTHON SHORTHANDS

1. for loop (list and dictionary):

Syntax: [expression for item in iterable]

Eg: res= [num*2 for num in iterable]

[] – lists ; {} - dictionary

2. if:

Syntax: if (condition): statement

Eg: if (a>b) : print(“a is greater than b”)

3. if-else:

Syntax: statement-1 if (condition) else statement-2

Eg: print(“A”) if(a>b) else print(“B”)

4. for loop (set):

Syntax: { statement-1 for item in [list of items] }

Eg: uni_len= { len(words) for word in ['python', 'treehouse', 'blog']}

5. nested for loop:

Syntax: [[expression for item-1 in iterable-1] [for item-2 in iterable-2]]

Eg: [[x*y for in range(3)][for y in range(3)]

6. for loop with if condition:

Syntax: [expression for item in iterable if (condition)]

Eg: [x for x in arr if(x>0)]

7. for loop with if-else condition:

Syntax: [expression-1 for item in iterable if (condition) else expression-2]

Eg: [x for x in arr if(x>0) else y]

8. Taking two/more values in a single line:

a, b, c = map(int,input().split())

9. Taking array elements in a single line:

arr = list(map(int,input().split()))
